Ref : FULL-STACK DEVELOPER

Dear Hiring Manager,

During my studies at university, I've always wanted to learn python programming because of its simplicity and flexibility. It was my third programming language that I've learned with C++ and R being the first. Python was a language that I've taken up as a hobby on my own. I've used it almost every day and love having it as part of my life. For quite a few years now I've learned python for data science, GUI applications and web scraping. Recently before receiving this opportunity, I've been learning to code with the Django framework and have since then got the motivation to finish two Udemy courses on Django. I've built a to-do webapp and deployed it using PythonAnywhere. Also, I've used git to commit and push it to my GitHub account. Git is quite fun and easy to use when programming with python on computer. I am fairly okay with CSS and JavaScript but I am always open to learning and would always study a course or use YouTube and learn it.

Even though I've graduated with a BSc in Actuarial Science and have goals of becoming a data analysts, I will always give my best in whatever I embark on hence the reason why I believe I may have the skills and discipline that you are looking for in the job vacancy, **Full-Stack Developer** as advertised on LinkedIn.

With both my personal achievements and curiosity to learn more. I am certain that I have what you need and would become a beneficial extension to AVASANT.

I am also aware that I have lacked the experience that you need but I am certain, I will not disappoint.

In addition, I am adept and confident in my communication and management expertise. This foundation was built upon my work experience in working at Ministry of Works and Infrastructure through the summer vacation, 9th July to 8th September 2015 as a clerical assistant in the Accounting Department, where I was valued by the supervisor and her staff. I have also worked in Food Xtra for 2 weeks in which I helped pack grocery items and was a 'trolley' pusher due to the circumstances of job availability. Furthermore, I have leadership qualities and is a team player as I was the Public Relation Officer for the Actuarial Science Club in UWI and was the President of the Inventors Club at Presentation College. I tend to always engage in learning something new or learning a language and improving my skillsets.

Please do note, I am a very determined and enthusiastic individual, self-motivating, open minded, focused, team player, respectful, honest, and willing to learn any task that would allow me to ascend in your firm. I hope that this cover letter and the attached Resume are enough for my admission to your company. If any other information were needed, I would gladly provide it, if you contact me by the number above. I am willing to be interviewed by you or any representative of your firm at any convenience deem fit.

Thank you for your time and consideration.
